**Expanded Pure Water Monterey Groundwater Replenishment Project
Notice of Supplemental Environmental Impact Report Preparation and Public Scoping Meeting**

Monterey, Calif., May 15, 2019: As project lead agency, Monterey One Water (M1W) is preparing a Supplemental Environmental Impact Report (EIR) for its proposal to expand the Pure Water Monterey Groundwater Replenishment (PWM/GWR) Project. The expanded PWM/GWR Project would be implemented in the event the Monterey Peninsula Water Supply Project encounters obstacles that prevent timely, feasible implementation.

The public is encouraged to review and comment on the scope of environmental issues as well as mitigation measures which should be explored in the Draft Supplemental EIR. The Notice of Preparation (NOP) describing the project concept is available online at www.purewatermonterey.org, by emailing purewatermontereyinfo@my1water.org, or by calling 831-645-4623. A public scoping meeting will be held:

Wednesday, June 5, 2019
5:30 PM – 7:00 PM
Oldemeyer Center, Blackhorse Meeting Room
986 Hilby Avenue, Seaside, CA 93955

Participants are encouraged to submit written comments, and comment forms will be supplied at the scoping meeting. Written comments may also be submitted anytime during the NOP scoping period (May 15 to June 14, 2019) to the mailing address or email address listed below:

By Mail: Monterey One Water
ATTN: Rachel Gaudoin
5 Harris Ct., Bldg. D
Monterey, CA 93940

By Email: purewatermontereyinfo@my1water.org

The 30-day comment period closes at 5:00 PM on June 14, 2019.

About Monterey One Water

Monterey One Water (M1W) is a public agency responsible for the safe treatment and utilization of wastewater. Serving the residents and businesses of Castroville, Del Rey Oaks, Marina, Monterey, unincorporated parts of Monterey County, Moss Landing, Pacific Grove, Salinas, Sand City, and Seaside, M1W works with its member entities and partner agencies to provide reliable services to its customers and the community. This includes wastewater treatment in addition to helping diversify the area's water supply through recycled water production and groundwater recharge.
